# **Economic Impact (40 points):**

#### Goals & Strategies This criterion assesses the potential economic benefits of the proposed project and its alignment with regional priorities. Project strongly aligns with Project aligns with GO GO Virginia's mission and Project does not align Virginia mission and Project aligns with GO regional priorities and is with GO Virginia regional priorities, with Virginia mission and regional expected to deliver strong potential benefits mission or regional priorities, but the scale of transformative regional priorities. (0). but either job creation OR impact is limited (e.g., few impact through a wage growth OR combination of high-wage new jobs created, modest strengthening of tradedwage gains, or benefits not job creation, economic sector is not significant in clearly tied to traded-sector diversification, and the near term. growth). strengthening of tradedsector ecosystems 15 10 **Metrics & Outcomes (2)** Project application should include relevant data that illustrates the regional need, along with appropriate and comprehensive metrics to track both project outputs (activities) and outcomes (results). Metrics should be quantitative where possible, but may also include relevant qualitative measures. Applications should explain the sources and methodology used to develop metrics, show how the project will advance GO Virginia core performance outcomes, and include a plan for remedial action if outputs or outcomes are not achieved. Application includes clear, Metrics and Metrics and outcomes Metrics and outcomes are realistic, and outcomes are identified, but identified, but methodology comprehensive metrics missing or not underdeveloped or not or sourcing not clear, and with identified sources and relevant to the relevant. Outcomes may be outcomes may be methodology, shows how project unrealistic or unclear. overstated. the project will drive GO Virginia core outcomes, and outlines how results will be tracked and adjusted if needed. 0 5 10 15 **Economic Impact Analysis** Applicants must provide an economic impact analysis that explains the expected benefits of the project relative to its costs. The analysis should describe the project's potential return, explain key assumptions and methodology, and demonstrate how the project delivers value to the region and Commonwealth. Analysis clearly

0	4	7	10
No economic impact analysis provided, or analysis is not credible.	Analysis projects only a nominal or unclear benefit; assumptions are significantly inflated or unsupported.	Analysis shows potential benefits but relies on weak, unclear, or overstated assumptions.	demonstrates credible benefits with well- supported assumptions and strong potential for additional economic impact.

# Regional & Interregional Collaboration (20 points):

# (4) Regional Collaboration

Projects should demonstrate strong participation from multiple localities, businesses, higher education institutions, and other partners. Successful applications show meaningful, strategic collaboration, with local partners actively involved in project development and implementation, and clear evidence that the effort complements—not duplicates—existing programs.

Project is not an interregional collaboration and will not impact will not significantly impact localities	Project reaches a large population but has limited meaningful participation from local partners, or vice versa.	Project involves multiple regions with at least one actively participating locality in each region and engagement from other stakeholders	Project significantly impacts the majority of the population across multiple regions and demonstrates meaningful collaboration among localities, businesses, higher education, and other key partners
0	4	7	10

# (5) Regional Priorities

Strategies should align with the Growth & Diversification Plan for each region, and the targeted growth industries outlined in those plans. Projects impacting more than one region in a manner consistent with each region's Growth & Diversification Plan shall score higher. Where applicable, projects may also show alignment with other significant regional strategies (such as TPI or REI). Projects that impact more than one region in ways that are consistent with each region's strategies will score higher.

Project does not align with the target industries and strategies in the G&D Plan(s).	Alignment with the G&D Plan(s) is vague or indirect, and prioritization not well developed.	Project generally aligns with target industries outlined by the region(s) in the G&D Plan(s), but not demonstrated clearly in the application.	Project clearly aligns with the target industries and diversification strategies outlined in the G&D Plan(s) for each participating region.

### (6) Partnerships & Coordination

Projects should demonstrate the involvement of businesses, colleges and universities, and other public and private entities within the region in the conceptualization and implementation of the project. Projects demonstrating cost efficiencies, repurposing of existing funds, and leveraging of existing assets shall be given special consideration in scoring. Project should not be duplicative of existing efforts, programs, or funding streams.

Few or no partners identified; little evidence of coordination.	Partners are named but roles are vague or limited; coordination mechanisms are unclear	Several partners engaged with defined roles; some coordination structure in place; partial evidence of leveraging assets or avoiding duplication.	Strong set of partners with active roles; clear coordination mechanisms; effective use of existing assets; and evidence that the project is complementary, not duplicative

# **Project Readiness (20 points)**

# (7) Timeline & Milestones

Applicants should have the capacity and experience to implement the proposed scope of work, and this should be demonstrated through a track-record of experience and work completed to date. Applicants should be able to execute a contract within 6 months and complete the scope of work within the contract grant period. Projects should reflect a realistic timeline for project milestones, with drawdowns planned accordingly and on a reimbursement basis. Regional Councils shall coordinate with local governments and subject matter experts in the review of the applications to ensure project readiness and support, and to identify potential barriers to implementation which should be acknowledged in the application.

Timeline exceeds the	Timeline is unrealistic.	Timeline and/or milestones	Timeline is realistic with appropriate milestones identified with drawdown schedule planned accordingly.
24 month max or no	Milestones identified, but	may be optimistic, but	
milestones	underdeveloped or not	applicant able to address	
established.	relevant.	potential delays or barriers.	
0	4	7	10

# (8) Budget & Match

Applications shall present a comprehensive budget with adequate matching resources, and sufficient cash to address changes to the project costs or scope. Match shall include only what is reasonable and necessary for the project at hand. Match shall not include state resources. All funds shall be documented through letters of commitment, in-kind forms, or other relevant documentation outlining the availability of the necessary matching funds.

	<u>,                                      </u>		
Project has inadequate resources to cover the scope of work. Matching resources are not relevant or necessary for the project.	Resources may cover the scope of work, but match relies heavily on in-kind contributions with little available cash to address unexpected costs.	Application includes a comprehensive budget with relevant and sufficient matching cash and in-kind resources to cover the scope of work and changes.	Application includes a comprehensive budget with relevant and welldocumented match. Project demonstrates strong financial capacity with more than sufficient cash resources committed

# Project Sustainability (20 points): Questions 17, 18-19

# (9) Financial Sustainability

Projects shall demonstrate a plan for financial sustainability after grant funds are exhausted. Projects should not include one-time programs or events. Commitments for long-term implementation or financial support should be documented through letters of commitment. Financial sustainability may refer to funding for future phases of work as it applies to joint site and infrastructure development, or future operations as it applies to construction-related projects.

Project is a one- time program or event that is not sustainable beyond the GOVA funding.	Plans for financial sustainability are vague or underdeveloped, and firm commitments are not in place.	Plans for financial sustainability are presented, with some firm commitments in place.	Plans for financial sustainability are thorough, with a realistic revenue model or strong financial commitments beyond GO Virginia funding.
0	4	7	10

# (10) Demand

Projects shall demonstrate a pipeline of demand from private industry partners and/or end users (workers). Demand should be demonstrated through letters of support and commitment for private industry partners. Projects that are scalable and replicable across regions shall score higher.

Project is a one-time program or event without ongoing demand.	Application indicates a pipeline of demand, but not thoroughly documented.	Application demonstrates strong demand through commitments from multiple private industry partners and/or a proven track record, with potential for scalability and replication across regions.
